Campbell County Adult Treatment Courts

Mission Statement

The mission of the Campbell County Adult Treatment Courts is to provide the judicial system a sentencing alternative for substance abusing offenders while enhancing community safety, reducing crime, and lowering criminal justice costs. We will empower substance abusing offenders to attain and maintain a drug and alcohol-free life while maintaining family, career and community ties.

Vision Statement

The vision of the Campbell County Adult Treatment Courts is to be recognized statewide as a successful, innovative program which meets and exceeds the State of Wyoming's performance measures. Eligible participants will be identified expeditiously using evidence-based best practices. Participants will begin their recovery process with immediate involvement in treatment which meets their needs. Participants will be treated fairly and with respect by a team of professionals all striving for a common goal. In so doing, the Campbell County Adult Treatment Courts will reduce recidivism by participants, strive for retention and graduation for all who enter the program, aim for long-term continuous sobriety for each participant and offer services which will assist participants in becoming a healthy, productive, law-abiding citizens.

Philosophy

Campbell County Adult Treatment Courts operate as problem-solving courts and consists of two separate tracks: a Felony Treatment Court program and Misdemeanor Treatment Court program. The combination of judicial supervision, intensive treatment, and supervision, along with rewards and sanctions are unique traits of treatment court. Families and significant others are encouraged to participate in the program. They provide moral support, attend counseling and education sessions, and are encouraged to remain substance free as well. Our program is based on research findings that treatment and recovery for most substance-abusing offenders works best in a community-based, coordinated system of comprehensive services. Team members work together to improve the lives of individuals and families affected by alcohol and drug abuse by ensuring access to clinically sound, cost-effective treatment that reduces the health and social costs to our community and produces substance-free, productive members of society.

10 Key Components of Adult (Drug) Treatment Courts (Adopted from the National Association of Drug Court Professionals)

1. Adult Drug Courts integrate alcohol and other drug treatment services with justice system case processing.
2. Using a non-adversarial approach, prosecution and defense counsel promote public safety while protecting clients due process rights.
3. Eligible participants are identified early and promptly placed in the Adult Drug Court program.
4. Adult Drug Courts provide access to a continuum of alcohol, drug, and related treatment and rehabilitation services.
5. Abstinence is monitored by frequent alcohol and other drug testing.
6. A coordinated strategy governs Adult Drug Court responses to participants compliance.
7. Ongoing judicial interaction with each Adult Drug Court participant is essential.
8. Monitoring and evaluation measure the achievement of program goals and gauge effectiveness.
9. Continuing interdisciplinary education promotes effective Adult Drug Court planning, implementation, and operations.
10. Forging partnerships among Adult Drug Courts, public agencies, and community-based organizations generates local support and enhances Adult Drug Court program effectiveness.

Misdemeanor Treatment Courts follow the ten components of Drug Courts and the guiding principles of DWI Treatment Courts as listed below: (also adopted from the NADCP)

The Guiding Principles of Misdemeanor (DWI) Treatment Courts

GUIDING PRINCIPLE #1: Determine the Population

The process of identifying a subset of the Misdemeanor offender population for inclusion in the Misdemeanor Court program.

GUIDING PRINCIPLE #2: Perform a Clinical Assessment

A clinically competent and objective assessment of the impaired-driving offender must address

a number of bio-psycho-social domains including alcohol use severity and drug involvement, the level of needed care, medical and mental health status, extent of social support systems, and individual motivation to change.

GUIDING PRINCIPLE #3: Develop the Treatment Plan

Substance dependence is a chronic, relapsing condition that can be effectively treated with the right type and length of treatment regimen. In addition to having a substance abuse problem, a significant proportion of the Misdemeanor population also suffers from a variety of co-occurring mental health disorders. Misdemeanor Courts must carefully select and implement treatment strategies demonstrated through research to be effective with the hardcore impaired driver to ensure long-term success.

GUIDING PRINCIPLE #4: Supervise the Offender

Driving while impaired presents a significant danger to the public. Increased supervision and monitoring by the court, monitoring agent, and treatment provider must occur as part of a coordinated strategy to intervene with hardcore DWI offenders and to protect against future impaired driving.

GUIDING PRINCIPLE #5: Forge Agency, Organization, and Community Partnerships

Partnerships are an essential component of the Misdemeanor Treatment Court model as they enhance credibility, bolster support, and broaden available resources.

GUIDING PRINCIPLE #6: Take a Judicial Leadership Role

Judges are a vital part of the Misdemeanor Treatment Court team. As leader of this team, the judge's role is paramount to the success of the program. The judge must be committed to the sobriety of program participants, possess exceptional knowledge and skill in behavioral science, own recognizable leadership skills as well as the capability to motivate team members and elicit buy-in from various stakeholders.

GUIDING PRINCIPLE #7: Develop Case Management Strategies

Case management, the series of inter-related functions that provides for a coordinated team strategy and seamless collaboration across the treatment and justice systems, is essential for an integrated and effective Misdemeanor Treatment Court program.

GUIDING PRINCIPLE #8: Address Transportation Issues

Though nearly every state revokes or suspends a person's driving license upon conviction for an impaired driving offense, the loss of driving privileges poses a significant issue for individuals involved in Misdemeanor Treatment Court. In many cases, the participant solves the transportation problem created by the loss of their driver's license by driving anyway. With this knowledge, the court must caution the participant against taking such chances in the future and to alter their attitude about driving without a license.

GUIDING PRINCIPLE #9: Evaluate the Program

To convince stakeholders about the power and efficacy of Misdemeanor Treatment Court, program planners must design a Misdemeanor Treatment Court evaluation model capable of documenting behavioral change and linking that change to the program's existence.

GUIDING PRINCIPLE #10: Ensure a Sustainable Program

The foundation for sustainability is laid, in part, by careful and strategic planning.

Identify Opioid Use Disorder (OUD) as funding may be specifically available for this population.

1.02 INTENSIVE OUTPATIENT TREATMENT

Intensive outpatient program (IOP) and/or Level II.1 level of care means structured substance use and mental health treatment programming consisting primarily of counseling and education. IOP is more intensive than outpatient counseling and can function as a step-down from a higher level of care. Attendance at 12 step support group meetings is mandatory in all phases of treatment. (Provider must be flexible and willing to provide evening and weekend services to accommodate clients with full-time employment and extenuating circumstances.) The Provider shall have sufficient training and/or experience to provide services to the criminal justice population using a drug court model.

The Adult Treatment Court Program consists of a phased format with decreasing intensity, monitoring, and supervision. Intensive outpatient (IOP) is the primary modality for treatment. Treatment programming is defined as "phases," which vary slightly between Felony Treatment Court and

Misdemeanor Treatment Court. The provider shall comply with the treatment requirements of the Wyoming Department of Health's rules and regulations for substance abuse standards as well as their standards specific for court supervised treatment programs, and the Wyoming Mental Health Professions Licensing Board's rules and regulations. Some specific expectations of the provider for IOP treatment services at the beginning of the program include, but are not limited to:

- A minimum of 9 hours per week of structured clinical treatment, three (3) times a week with no more than three (3) days between clinical services, excluding holidays, for a minimum of 72 treatment hours.

- Be available within two (2) weeks of the assessment unless other arrangements have been made and approved by Treatment Court Staff.
- Address the client's needs for psychiatric and medical services through consultation and referral arrangements.
- Therapies and intervention services shall be provided in an amount, frequency and intensity appropriate to the client's individualized treatment plan shall include family therapy and group therapy based on evidence-based best practices (12 step programs are not considered group therapy). The Provider shall address mental health concerns/co-occurring diagnosis by offering therapies to actively address, monitor, and manage psychotropic medication, mental health treatment and the interaction with substance use-related disorders. Services shall include recovery support or a referral to recovery support programs.
- Individualized treatment plans shall be completed in conjunction with the initiation of treatment and shall be developed with the client. The client and clinical staff responsible for the course of treatment will sign this initial treatment plan. Treatment plans shall be developed utilizing the assessment information, including ASAM dimensional criteria and the DSM diagnoses. Treatment plans shall document outcome driven goals that are measurable, that specify the changes in the client's symptoms and behaviors that are expected during treatment and shall describe improved functioning level of the client utilizing ASAM dimensional criteria. Treatment plans shall integrate mental health issues, if identified, as part of the assessment process, or at any point during the continuum of treatment.

Treatment plan reviews shall be evaluated throughout the course of treatment based on client's progress or lack of. Modifications shall be made as clinically indicated. The review shall include a written description within the client record of degree of progress or lack of progress for each stated goal and can be completed within the progress notes or as part of an ASAM dimensional criteria review form.

Copies of all treatment plans shall be provided to the Adult Treatment Court Director as they are developed and modified.

Level I

Overview: After the assessment of needs (assessments shall include comprehensive information regarding the client's bio-psycho-social needs) the client is on Level I of supervision much like house arrest. Clients are expected to obtain employment equivalent to full-time employment and/or perform community service work or educational programming equivalent to full-time employment. Clients contribute to the cost of the program by paying a monthly fee to Treatment Court. Clients are expected to also meet other financial obligations, such as child and family support. Clients are drug and alcohol tested regularly and are required to appear in Treatment Court status hearings. Home checks, surveillance and employment checks are done by phone and in person by the director, case manager, and Probation and Parole Agent(s).

Treatment Plan: Didactic, group therapy, individual therapy, and cognitive behavioral and reality therapy is used in Levels I-II. Treatment includes assisting clients with obtaining a sponsor and attending 12 step recovery meetings. Clients will also be seen on an individual basis no less than bi-weekly during which time additional services that may be needed, i.e. mental health therapy or EMDR, will be addressed and scheduled with a qualified provider. Depending on the client, this level lasts approximately twelve (12) weeks. A mental health evaluation shall be conducted for all Felony Treatment Court participants and Misdemeanor Treatment Court participants with results communicated to the Adult Treatment Court prior to the participant advancing to the next level of supervision and/or treatment.

Level II and III

Overview: The second and third supervision level continues as intensive supervision but a step down from house arrest. Clients are required to be employed at least thirty (30) hours a week, or in school, or performing community service work. Clients are subject to a curfew, home checks, random drug and alcohol testing, educational classes and other counseling as required by the Court or the Adult Treatment Court Staff/Team. Clients have weekly to bi-weekly treatment court appearances and are required to contribute to the cost of the program. The Treatment Court staff adjusts the frequency and intensity of meetings, alcohol and drug tests, home and job checks, and other monitoring to meet individual needs and reflect progress.

Treatment Plan: During this level, the client moves toward the relapse prevention treatment phase. This treatment phase may include additional services, such as vocational and educational training, nutrition classes, and budgeting courses. Weekly group therapy sessions consist of no less than two (2) hours per session for a minimum of four hours per week. Family therapy shall be utilized when indicated by client needs, involving family members and/or significant other(s). Family programming will be required of all clients before they can graduate, consisting of no less than nine (9) hours of treatment time. Individual therapy sessions occur no less than bi-weekly; however,

some clients may require more individual sessions. Clients continue to attend 12 step meetings at least twice a week and meet with their sponsor once a week. Time frame for relapse prevention is at least (8) eight weeks for DWI/Misdemeanor Treatment Court clients and ten (10) weeks for Felony Treatment Court clients.

Once the client has completed all requirements of relapse prevention, they may move into the aftercare phase of treatment. This phase consists of no less than (8) eight weeks for DWI/Misdemeanor Treatment Court clients and no less than ten (10) weeks for Felony Treatment Court clients. Individual therapy sessions shall take place at least once per month or more if needed.

Level IV

Overview: The lowest level of supervision, level four, is like traditional probation or parole supervision. The client begins to transition toward completion of the Adult Treatment Court Program. Employment is required at this level as well as continued attendance at 12 step meetings, and successful completion of a GED or HISEC if needed. Clients attend Treatment Court once a month or as the judge/team may require. All clients are employed or are in training for some sort of vocational position at this point.

Treatment Plan: During this level, clients are in a continuing care program to include group attendance, along with family and individual sessions as carried over from phase III of the clinical program. The therapeutic paradigm may change as far as time commitment is concerned, depending on the progress of the client. Clients are expected to continue to attend 12 step meetings at least two (2) times a week and meet with their sponsor once a week. As treatment progresses during level IV, clients transition into having individual counseling sessions on a monthly basis and, as the level progresses, monthly group, individual, and family counseling. This level is between eight (8) to twelve (12) weeks in duration.

Continuing Care Services will continue until graduation is held. This is the final level of the program. Clients are required to complete a continuing care plan as part of their treatment prior to graduation and must present their continuing care plan to the team. Submitter must provide a continuum of care of each participant that is individualized, based on the needs of the participant and to include at a minimum, substance use treatment, support services, continuing care, and integrated treatment for mental illness and substance use disorders for persons with co-occurring diagnoses.

The structured aftercare component of the program consists of scheduled meetings where the client is provided with continuing care discussions of understanding the relapse process, high risk situations, strategies for high risk situations, identify and handle urges/cravings, social pressure, anger management, leisure time in sobriety, building long term sobriety, lifestyle balancing in sobriety, and support them in their relapse prevention plan. Intervention will focus on aftercare and individual recovery through continued education/vocational training and volunteerism in the community and involvement with support groups and family.

12 Step Programming: The 12 step program and working with a sponsor are important components of the treatment and recovery process. The 12 step program is where the client learns how to internalize what has been presented in treatment. Anger management, violence prevention, victimization issues, and value formation are also covered in the treatment levels of the program.
